THE POWER OF ONE

WoodCream

Long-lasting
protection
for exterior
vertical wood.

Protecting the natural beauty of exterior wood.

Outdoors, it's vital to treat wooden surfaces with the right product. After all, you want the wood to look good for a long time. WoodCream is the ideal product **to protect and colour your exterior vertical wooden surface**. The product is suitable for both new and already treated wood. In addition to providing an optimal protection, the cream also preserves the natural look & feel of the wood.

WoodCream, Bold Black on Ayous Thermo
Many thanks: Vetedy, Restaurant Quadras
© Julien Boveroux Gartengestaltung GmbH

The innovative and ecological wax-based cream is based on **hydrophobic technology** especially developed for maximum wood protection. Its unique and active **self-cleaning formula** intensely nourishes the wood, preserves the breathable structure, and makes it water-repellent. And the beauty of it all: the wax cream comes in a **wide range of colours** and brushes smoothly. A joy to work with and a feast for the eyes.

BREATHABLE

- ✓ Wood pores remain open
- ✓ Air and water vapour can still pass through
- ✓ Moisture regulation is retained

WATER-REPELLENT

- ✓ Hydrophobic cream
- ✓ Long-lasting pearl effect
- ✓ Very durable protection against extreme weather conditions

SELF-CLEANING

- ✓ Water droplets slide off the wood, removing dirt particles from the surface
- ✓ Reduces the risk of micro-organism growth (algae, molds, fungi)
- ✓ Prevents frost damage

LOOK & FEEL

- ✓ Preserves natural look & feel of the wood
- ✓ Doesn't contain fillers, does not form a sealing layer (as opposed to paint, lacquers)
- ✓ Does not flake off: longer lifespan

The crème de la crème?

The product is very ecological thanks to the low consumption and the application in one layer. Moreover, the product contains **0% VOC**.

VOC's are harmful substances that are released when applying the product and which contribute to the greenhouse effect.

THE GREY COLLECTION ON PINE

- > Create an **instant aged look** by adding WoodCream Softener to one of the colours from this Grey colour collection.
- > A **transparent version (#0)** is also available in order to create a **non-coloured** effect. Since this version has no UV filter, Transparent (#0) allows the wood to age naturally while still protecting the wood and making it water-repellent. Apply it undiluted.

THE TRADITIONAL COLLECTION ON PINE

THE SCANDINAVIAN COLLECTION ON PINE

- > If you want to decrease the colour intensity of the existing WoodCream colours, you can dilute them with WoodCream Softener.

Colours shown only serve as an example. We recommend doing a test on identical sanded wood.

PRODUCT INFORMATION

Application method	Manual - Industrial
Usage	12-20 m ² /L *
Drying time	Depending on the climatic conditions: ± 12 hours
Water resistance	± after 3 hours the pearl effect will appear
Colour retention	Depending on the chosen colour, wood type and orientation of the vertical wood, the colour will last between 5 to 10 years. After about 5 years, the pearl effect (water-beading) will gradually diminish.
Cleaning of used materials	Water
Application Information	All vertical surfaces outdoors
Storage	The product can be stored up to 24 months. Store in dry conditions and in the original unopened packaging. Keep away from frost.
Advantages	Protection against sun, rain, wind and wear and tear
Packaging	Can: 30 ml - 1 L - 2,5 L - 5 L

* These usages are merely indicative. Results depend on wood type, sanding and method of preparation. It is always recommended to make a sample in order to calculate the exact usage.

- > The long contact technology ensures a perfect absorption of the cream into the wood's pores, without covering them, thus ensuring the wood's natural moisture balance and structure.

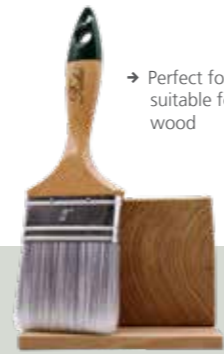

TOOLS

→ Perfect for corners

WoodCream Brush 2"

→ Perfect for larger surfaces; suitable for even and rough wood

WoodCream Brush 3"

WoodCream Brush 1"

The synthetic bristles of the WoodCream brush are very soft and fine, so they do not leave brush marks when applying the products. In addition, the product will not dry too quickly on these types of bristles so you have enough time to apply it.

Perfect for applying WoodCream and WoodCream Softener • Ensures an even application • Very durable: high quality and stainless steel (inox) • Perfect for processing water-based products • After use with WoodCream, you can simply rinse the brush with water

Block Brush 3x10

This block brush was developed especially for the WoodCream. It is very suitable for extra large surfaces thanks to its dimensions (3 cm thick x 10 cm wide).

Stirring Stick

The Rubio Monocoat stirring stick is perfect for stirring our products such as Oil Plus 2C, Hybrid Wood Protector and WoodCream. This way you ensure that the colour pigments are well mixed and that you get an equal result.

- Available in wood and metal (re-usable)

Can Opener

With our special can opener, you can easily open cans without damaging them.

- Does not damage cans and lids
- Made from stainless steel
- Can be hung on the can
- Can also be used as bottle opener

Pouring Spout

The pouring spout is a handy tool to work in a clean way with our Rubio Monocoat products. Not only can you keep your workplace spotless, you can also store your cans better after use.

- Re-usable
- User-friendly
- Allows better storage of your cans

Measuring Cup 350 ml

Measuring cup to mix products (some of our products need to be combined with an Accelerator or Softener)

- Convenient measuring lines
- Re-usable cup
- Perfect for smaller projects

Measuring Cup 1800 ml

Measuring cup to mix products (some of our products need to be combined with an Accelerator or Softener)

- Convenient measuring lines
- Re-usable cup
- Perfect for bigger projects

WOODCREAM APPLICATION IN 6 SIMPLE STEPS

STEP 1

Sand the surface scratch-free according to industry standards. Final sanding grit should be between 80-120.

STEP 2

Prepare the surface. Clean it with Exterior Wood Cleaner and a nylon scrubbing brush (wear gloves!). Use a mixture of 10% Exterior Wood Cleaner and 90% water. Rinse well with clean water afterwards and allow the surface to dry well.

STEP 3

Stir WoodCream well before applying it (undiluted).

STEP 4

Apply carefully and evenly to the vertical surface with a WoodCream Brush, in the lengthwise direction of the wood. Tip: we advise to keep a wet edge to avoid overlaps.

STEP 5

Work in zones of 3 to 4 boards in the direction of the wood fibre. Spread out the product in one go with the application brush and go over it several times.

STEP 6

Allow the surface to dry 12 hours.

SCAN TO WATCH A HOW TO VIDEO

CREATING AN AGED/TRANSPARENT EFFECT ON NEW WOOD WITH WOODCREAM SOFTENER

- Stir WoodCream well and dilute with WoodCream Softener at a ratio of 9 units WoodCream to 1 unit WoodCream Softener. You may adjust this ratio up to 1 unit WoodCream to 1 unit WoodCream Softener to achieve the desired result.

CREATING A NON-COLOURED EFFECT

- In order to create a non-coloured effect you can use the colour "Transparent #0" (undiluted) from the Grey Collection. While this version has no UV filter it allows the wood to age naturally, but it still protects the wood and makes it water-repellent.
- With rough, absorbant or dry wood (<14% moisture content) we advise to dilute the product with WoodCream Softener (proportion: max 1:1)
- In general we recommend a yearly visual check-up just after winter season.

WOODCREAM SOFTENER

Rubio Monocoat already offers excellent protection with the WoodCream. Of course, exterior wood has to withstand all kinds of weather, which means that **maintenance** is sometimes necessary. It is therefore best to carry out a **yearly visual check-up** just after winter season. Do you see some fading of colour or a diminished wood protection? Then the **WoodCream Softener** combined with WoodCream is the ideal maintenance partner.

The WoodCream Softener is also the perfect WoodCream partner to **create different colour effects**.

How to do that? Just read the instructions below!

STEP 1

Clean the wood. Use a mixture of 10% Exterior Wood Cleaner and 90% water (make sure the product does not get in the eyes). Clean the surface again with low pressure water and a soft brush; sanding is not necessary.

STEP 2

Mix, stir and dilute WoodCream with WoodCream Softener at a ratio of 9 units WoodCream to 1 unit WoodCream Softener (adjust ratio for the desired result to max 1:1).

STEP 3

Spread out the product in one go, carefully and evenly, in the direction of the wood fibre. Go over it several times. Work in zones of 3 to 4 boards. It's best to work wet-in-wet.

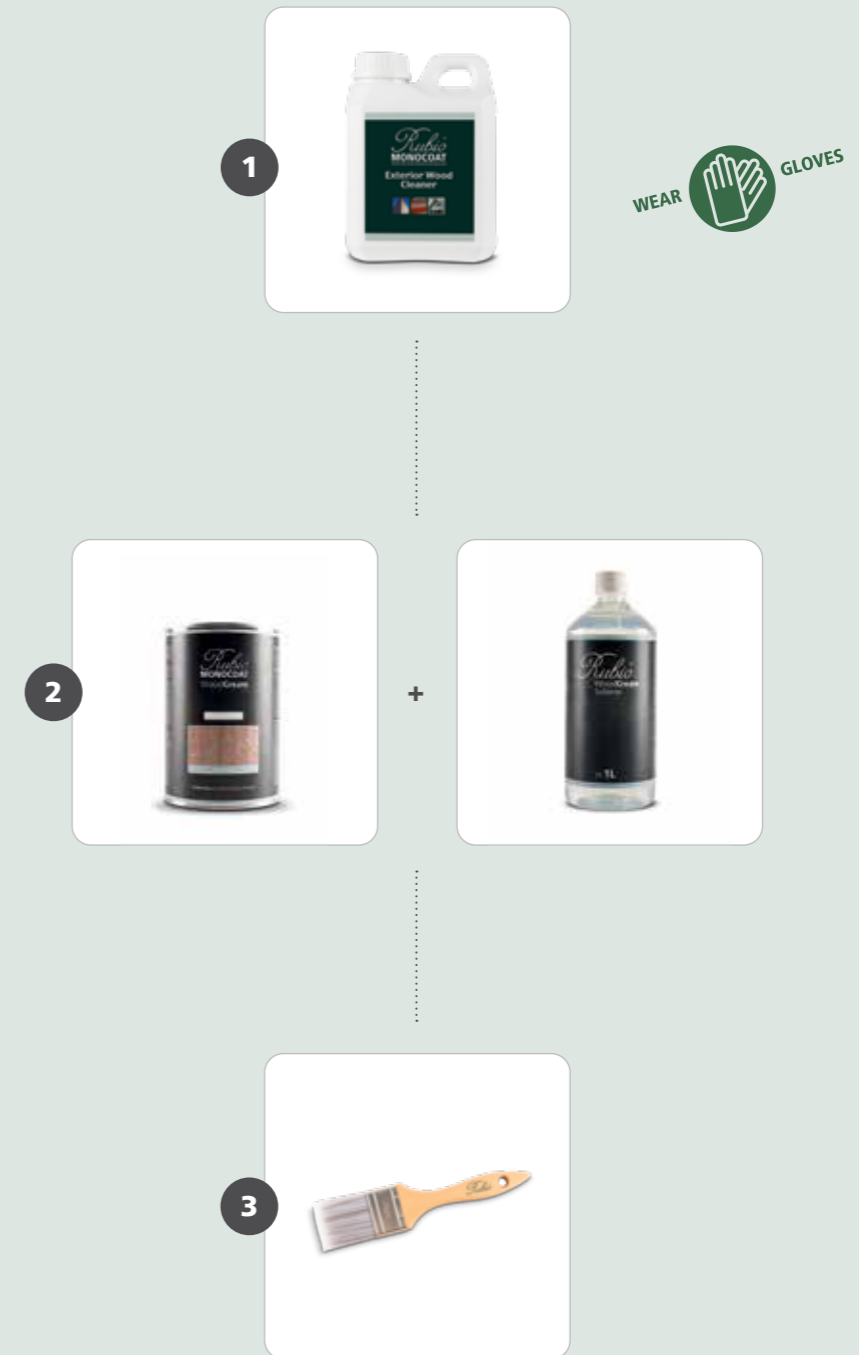

WoodCream Softener must always be **used in combination with WoodCream**. Do not use WoodCream Softener on a standalone basis.

UNIQUE CHARACTERISTICS

- › 0% VOC
- › Reduces the solid content without changing the viscosity
- › Elongation of the drying time
 - Easier to work with in hot conditions
 - Reduces the risk of overlaps
- › Easier spreadability on rough and absorbent substrate
- › Reduces layer build-up when renovating and refreshing WoodCream and when WoodCream is applied in 2 layers

IS YOUR WOOD SUFFERING FROM DIRT AND GREEN DEPOSITS, FADING OF COLOURS OR DIMINISHING PEARL EFFECT?
